### Concept Map Books

## Concept Map Book

Concept maps demonstrate relationships between ideas. They help students understand concepts by clarifying ideas and terms, and by dividing complex concepts or processes into smaller parts. Students can use concept maps to relate, define, brainstorm, and sequence.

#### Instructions:

1. Fold a sheet of paper along the long or short axis, leaving a two-inch tab uncovered.
2. Fold in half or in thirds. (Additional tabs can be created by folding into more parts.)
3. Unfold and cut along the inside fold lines to create tabs.
4. Have students identify the concept by writing key words or using pictures on the two-inch tab. Draw arrows from the central idea to the tabs, where students record data underneath each tab.
