Folded Charts & Tables

Tables are organized along vertical and horizontal axes, while charts are organized along one axis, either horizontal or vertical.

Use the folds in the chart or table as guides to draw easy, straight vertical and horizontal lines.

Instructions:

1. Fold the vertical columns needed to make the table or chart.
2. Fold the horizontal rows needed to make the table or chart.
3. Label the rows and columns.

Click on your instructional level to see photographed examples:
